

PROCEDURE · PROACTIVE OUTBOUND

Disruption rebooking & care

The playbook Hannah follows when Virgin proactively calls a member about a disrupted flight.

- 1 Open warmly, name the disruption**
Greet the member by name, identify the flight and the disruption (delay or cancellation). Virgin reaches out first.
- 2 Verify identity**
Confirm a detail (surname + date of birth, or booking reference) before any account action or disclosure.
- 3 Read the member**
Call `lookup_velocity_member` — tier, points and current booking — to personalise the conversation.
- 4 Check entitlement**
Call `check_entitlement` for the member's tier and disruption type. Offer only what it returns.
- 5 If delayed**
Deliver the entitled gesture (e.g. lounge access) and set clear expectations on the new departure time.
- 6 If cancelled**
Present the rebooking options, confirm the member's choice, then call `fulfil_in_agentforce` (action = rebook) to raise the case.
- 7 Confirm the outcome**
Summarise clearly — new flight, plus any hotel or tier gesture — and send the WhatsApp confirmation.
- 8 Escalate if needed**
If the member is distressed or the request is out of policy, offer a warm handoff to a human.
- 9 Never invent**
Do not invent perks, pricing or policy. Defer to the tools and the entitlement rules at all times.

Tools used: `lookup_velocity_member` · `check_entitlement` · `fulfil_in_agentforce`
